

Mobile Broadband USB Modem Compatibility Matrix (Cisco RV132W ADSL2+ Wireless-N VPN and RV134W VDSL2 Wireless-AC VPN Router)

Updated April 2019

Introduction

This document lists the Mobile Broadband USB modems that are compatible with the RV132W and RV134W routers.

Service Provider	Manufacturer	Dongle Model	Technology
Telstra	Huawei	E8372h-608 (Black/Unlocked)*	4G/LTE
AT&T	Netgear (Sierra Wireless)	AirCard 340U (AT&T Beam)	4G/LTE
Sprint	Netgear (Sierra Wireless)	AirCard 341U	4G/LTE
Telstra	Netgear (Sierra Wireless)	AirCard 320U	4G/LTE
Verizon	Pantech	UML290	4G/LTE
Vodafone	Huawei	E172	3G
Reliance	Huawei	EC159	
O2, 1&1, Beeline	ZTE	MF190	3G

Important Notes

- A USB modem is automatically discovered and configured when connected to the router. A custom configuration for network access can be added after the modem is detected.
- If the router is configured for Connection Failover, the USB modem will only attempt to connect after higher priority interfaces fail to connect.
- If not using Connection Failover, the USB modem will attempt to connect immediately.
- Use of the Mobile Broadband USB Modem is primarily meant for data services only. Voice quality over the mobile network cannot be guaranteed.

USB Modem Initialization and Connection Status via the USB Light

During installation, USB light on the router will indicate the progress of initialization of the USB modem. The behavior of the USB light is as follows:

- **Off:** When no 3G/4G USB dongle is connected or the USB dongle is not recognized.
- **Solid green:** When the 3G/4G USB dongle is recognized and currently connecting to the ISP network.
- **Flashing green:** When the 3G/4G USB dongle is successfully connected to the Internet Service Provider (ISP) and the port is receiving and sending data.
- **Solid amber:** When the USB dongle is recognized but fails to connect to the ISP.
